

# Provider Enrollment is the key to receiving reimbursements that you deserve

## The First Step in the Revenue Cycle

**Provider Enrollment Services**, sometimes known as Payer Enrollment or Credentialing, are specialized services that include Medicare, Medicaid, and commercial insurance enrollments, CAQH maintenance, privileging, NPI registration, and more. For example, provider enrollment services are a cost-effective solution for medical providers to add them on insurance plans and networks, allowing in-network payment for services offered to patients. The Provider Enrollment Service (PES) team at Advantum Health will manage the documentation, payer portals, enrollment, and revalidation for you.

What does all of this mean? Instead of hiring, training, and maintaining employees required to manage all of these complex enrollment tasks, Advantum Health's Provider Enrollment team of experts will do the work. You and your team can focus on servicing patients and efficiently receiving reimbursements.

Finally, in addition to reduced administrative loads and increased accuracy, enrollment is vital when being out of network could mean telling long-time patients to seek another doctor. The last thing a practice wants to do is turn away a patient!

### The Advantum Advantage:

- We do not outsource our work; each provider enrollment expert is an Advantum Health team member
- Service is prompt and precise
- Powerfully accurate, efficient, and economical AI utilization.

# Advantum Health reduces administrative burdens and costs through our affordable Provider Enrollment Services

Why should Advantum Health (AH) handle your provider enrollment services? AH manages client enrollment every day with services such as:
