“Advantum has been very attentive to our practice and molded well with our companies management team.”

Don S.

“When working with Advantum, it feels like I am working with people who invest in my success just as much as I do”

Fatimah H.

With Advantum managing your legacy AR, you can aggressively collect on past due balances, proactively preventing write-offs and decreasing AR days.

Accounts Receivable Follow Up

We champion the health of your revenue cycle

How It Works

We dig in to familiarize ourselves with the state of your accounts receivable so that we can build an AR strategy and denial management process that meets the specific needs of your practice.

We start by analyzing your AR aging reports, overdue accounts and claim denials. We prioritize recovery opportunities and set resolution activities into motion. We're in direct and constant communication with your insurance payers and patients throughout the process to facilitate fast, optimal outcomes. We seamlessly manage the process from beginning to end so you don't have to, and you have full transparency into account status and workflow every step of the way.

Scalable, Customized Expertise

Your AR operations are transformed through a customized combination of personal service and technological automation that achieves maximum financial impact.

Innovative, Proprietary Technology

Our innovative software, Advantum Ai, streamlines processes, increases payment efficiency, provides real-time visibility, ensures compliance and reduces administrative burden.

Dedicated Account Management

You will enjoy the personal attention of a dedicated client success representative who supports implementation, strategic guidance, issue resolution and performance reporting.

About Advantum Health

Advantum Health is the industry-leading practice revenue management authority.
